

Sheffield Fruit Trees

Plums

Hallamgate Purple

Cutting from Broomhill, a rich, fruity purple coloured plum, can eat fresh or cook. Suited to northern climate.

Hallamgate Yellow

Cutting from a beloved tree in Broomhill, sweet pearlescent mid-sized early yellow plum. One of our favourites at abundance HQ! Suited to northern climate.

Marjorie's Seedling

A popular plum which is both good to cook with but also delicious raw when fully ripe off the tree. Crops heavily and good disease resistance. Crops later in September (late for a plum).

Opal

An excellent early dessert plum, similar to Victoria but with better flavour. Medium-sized reddish-purple thin-skinned fruits with golden flesh and superb sweet flavour. One of the most reliable varieties. Can be grown in the north.

Goldfinch

A bright yellow dessert plum with good flavour.
